

HYBRID LEAN SIX SIGMA YELLOW BELT

LEAN FOUNDATIONS: Embedding Lean for Sustainable Results:

The Lean Six Sigma Yellow Belt is a one-day program that builds the **essential foundations** of Lean thinking and problem-solving. Designed for team members, supervisors, and emerging leaders, this course develops practical skills to improve safety, quality, and communication within your organisation.

What sets this program apart is our proven approach to embedding training for sustainable results. Every Yellow Belt participant benefits from pre-event coaching, which aligns leaders and attendees before the workshop, and post-event coaching, which supports the transfer of learning back into the workplace. This ensures that skills are not just learned, but applied and sustained – driving meaningful and lasting improvement.

The program concludes with a short assessment and practical submission, and optional Lean Six Sigma Yellow Belt Certification from Cardiff University.

The Enterprise Excellence Group
LEAN Program provides:

1. **Lean Awareness** - White Belt
2. **Lean Foundations** - Yellow Belt
3. **Lean Practitioner** - Green Belt
4. **Lean Coach** - Black Belt
5. **Lean Master** - Master Black Belt
6. **Lean Leader** - Adaptive Leadership
